Summary

Automation Test Engineer with experience in designing and implementing test automation process from scratch. I know how to build and integrate into development life cycle test automation which brings significant value for your company. I believe in DevOps, modern JavaScript-based test tools and a teamwork approach.

- Experienced in designing testing strategy from zero
- Experienced in implementing unit, integration, end-to-end tests from scratch
- Experienced in building CI infrastructure for test automation
- Follow best practices for testing microservice-based applications
- Awesome team player
- Ability to break down complex problems into simple solutions
- Have 'can learn' and 'can do' attitude

Technical Skills

Automation tools: most JavaScript-based tools: Jest, Playwright, Puppeteer, Cypress, TestCafe, Mocha, WebdriverIO, Protractor

Languages: JavaScript (including TypeScript), Python, C#, Java

CI/CD tools: Docker, Kubernetes, Concourse CI, GitHub Actions, AWS, Argo Workflows, Jenkins, TeamCity

Other: Postman, JMeter, SoapUI, Fiddler, Insomnia, Jira, bash scripting, SQL (MySQL, PostgreSQL)
